Nova Scotia Fishery

1996

Preface

The Nova Scotia Fishery Statistical Overview provides the most recent available (September 1997) analysis of the Nova Scotia fishing industry for 1996. Where preliminary information is used, there may be some changes made before publication of the 1997 Annual Report (Spring 1998).

The various aspects of the fishery are arranged into three broad areas: Economic Impact, Landings and Values and Exports. Maps and graphs are included to enhance and clarify the statistics.

The overview has been prepared by:
Marketing Division
Nova Scotia Department of Fisheries and Aquaculture. Sources of information include Statistics Canada, Department of Fisheries and Oceans (Halifax, Moncton and Ottawa) and the Nova Scotia Department of Finance.

Nova Scotia Fishery

1996
Economic Impact

Gross Domestic Product

Gross Domestic Product is the total money value of all final goods and services produced in an economy over a one year period. "Double counting" is removed.

For example, the market value of seafood products in Nova Scotia was approximately $848 million in 1996. In determining G.D.P. of the fisheries sector, such things as the cost of packaging material (assume around $20 million) is subtracted from the market value. This $20 million is then added to the packing sector. This is done for all goods and services purchased for the fishing industry.

In 1996, the fishing industry again placed first among the primary resource sectors. Employment figures associated with G.D.P. show fisheries slightly decreased. The profile of Nova Scotia Fishery employment, as provided by the Statistics Canada Labour Force Survey, shows a slight employment increase in the harvesting sector, but a decline in the processing sector.

Nova Scotia Fishery

1996

Landings and Values

In 1996, Nova Scotia fish landings showed a slight increase in metric tonnes. The value of landings has shown a 8% decrease from 1995.

The value of the aquaculture industry increased this year to $12.9 million.

Preliminary landing figures for Canada indicate that Nova Scotia has the highest landings in both metric tonnes and dollar value. Lobster ranks #1 in value with having landed $201.5 million; Scallops rank second, at $57.6 million.

Please keep in mind that these landings and values are preliminary and can be subject to change.

Preliminary Landed Values for Nova Scotia 1995-96

Species	1995 Total MT	1996 Total MT	Total ($000) 1995	Total ($000) 1996

Nova Scotia Fishery

1996

Exports

Fish exports in 1996 accounted for 26.5% of all Nova Scotia exports and is still the largest of all product groups.

In 1996, Nova Scotia exported worldwide to 59 countries.

The Nova Scotia fishery exports are ranked by country and products in this chapter.

Nova Scotia Fish Exports 1996

By Species

SPECIES	QUANTITY (Metric Tonnes)	VALUE ($000)
Groundfish		
Blocks & slabs frozen	1,111	3,267
Dried/salt	12,248	81,121
Fillets, fresh	4,458	30,386

Nova Scotia Fishery

1996

Profile by County

The profile by county section reviews landings in summary by species group, followed by landings in county detail. In addition, aquaculture statistics and vessel licenses by county for Nova Scotia.
